

# ALPHABETICAL INDEX TO VOLUME 39

	Issue No.	Page No.		Issue No.	Page No.
The algal growth test for monitoring pulp and paper mill effluents	1	21	Effluents, The algal growth test for monitoring pulp and paper mill	1	21
Appita — The first 40 years	5	347	Elemental sulphur in kraft pulping, Effect of replacement of sodium sulphide by	5	387
The application of computer aided design and drafting to the engineering of pulp and paper mills	4	297	Engineering of pulp and paper mills, The application of computer aided design and drafting to the	4	297
Asian region, Production patterns for pulp and paper in the	3	181	The engineering of the Barwon paper mill at Fyansford	2	87
Aspects of on-site generation of chemical pulp bleaching chemicals	5	391	Environmental constraints on the availability and production of wood for industry in New Zealand	3	184
Availability and production of wood for industry in New Zealand, Environmental constraints on	3	184	Ethanol-water pulping and pulp properties of <i>Eucalyptus globulus</i> Lab, Kinetics of	6	455
Bark from pine pin chips, The segregation of	2	115	<i>Eucalyptus globulus</i> Lab, Kinetics of ethanol-water pulping and pulp properties of	6	455
Barwon paper mill at Fyansford, The engineering of	2	87	<i>Eucalyptus obliqua</i> L'Hérit, Genetic variation in the pulp qualities of	3	205
Bleaching stages of NZFP No. 2 bleach plant, Colour control of the first chlorination (D/C) and extraction (E1)	3	218	<i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> wood samples, Chemical analyses and oxidative studies of	5	361
The business of forestry	6	433	<i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> woods, A study of the delignification of	5	369
Career development — an investment in the future	4	277	<i>Eucalyptus regnans</i> wood, Delignification of, during soda pulping	2	110
Cement products, High yield wood pulps as reinforcement for	1	31	Extended delignification in a batch cooking system — report from start-up at Karlsborgs Bruk, Sweden	6	459
Changing world, Professional societies in a	5	349	Extractives and pitch, Determination of, by chromic acid oxidation	4	287
Characteristics of fibres and fines, Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 2:	5	379	Felts, On-machine sealed press	6	467
Chemical analyses and oxidative studies of <i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> wood samples	5	361	Fibres and fines, Characteristics of. Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 2:	5	379
Chemical aspects of pitch deposits in kraft pulping of hardwoods in Japanese mills	4	301	Finnish pulp and paper engineers, The further education of	6	430
Chemical pulp mill bleaching chemicals, Aspects of on-site generation of	5	391	Fire-damaged logs, Water spray storage of	1	8
Chemical pulping and bleaching, Recent developments in	4	310	Fire-killed <i>P. radiata</i> for treated roundwood posts, Harvesting and processing of	3	199
Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 1: Pulp properties	5	374	Fluorescence and Kubelka-Munk theory	6	433
Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 2: Characteristics of fibres and fines	5	379	Forestry, The business of	6	433
Chromic acid oxidation, Determination of extractives and pitch by	4	287	The further education of Finnish pulp and paper engineers	6	430
Coated paper, Overcoming the vessel picking tendency of	1	26	Genetic variation in the pulp qualities of <i>Eucalyptus obliqua</i> L'Hérit	3	205
Colour control of the first chlorination (D/C) and extraction (E1) bleaching stages of NZFP No. 2 bleach plant	3	218	Grammage uniformity, The role of headbox turbulence generators in	1	36
Colour measuring equipment, Comparison of some	4	307	Hardwoods in Japanese mills, Chemical aspects of pitch deposits in kraft pulping of	4	301
Comparison of some colour measuring equipment	4	307	Harvesting and processing of fire-killed <i>P. radiata</i> for treated roundwood posts	3	199
Composites containing wood pulp fibres	3	223	Headbox turbulence generators in grammage uniformity, The role of	1	36
Computer aided design and drafting, The application of, to the engineering of pulp and paper mills	4	297	High yield wood pulps as reinforcement for cement products	1	31
Condensed tannins (proanthocyanidin polymers), Some recent advances in the chemistry of, relevant to their use as industrial chemicals	6	477	How the New Zealand Clean Air Act relates to kraft pulp mills	3	187
Conference, 40th — opening address	4	272	Hydraulically transporting wood chips and tree logs, A new method of	3	213
Continuous digester washing models and prediction of washing efficiencies	1	41	Industrial chemicals, Some recent advances in the chemistry of condensed tannins (proanthocyanidin polymers) relevant to their use as	6	477
Continuous retention measurement on paper machine wire sections	6	463	Industry in New Zealand, Environmental constraints on the availability and production of wood for	3	184
Corrosion monitoring in the pulp and paper industry. Part 1 — Monitoring methods	6	472	Instruments, Digital conversion of paper testing Japanese mills, Chemical aspects of pitch deposits in kraft pulping of hardwoods in	4	301
C.R.C. kraft pulp mill in Northern Philippines, Program to improve the viability of the	2	84	Kinetics of ethanol-water pulping and pulp properties of <i>Eucalyptus globulus</i> Lab	6	455
Delignification of <i>Eucalyptus regnans</i> wood during soda pulping	2	110	Kraft pulp, Medium consistency oxygen delignification in an O(CD)(EO)D bleaching process for radiata pine	6	451
Determination of extractives and pitch by chromic acid oxidation	4	287			
Digital conversion of paper testing instruments	1	48			
Effect of replacement of sodium sulphide by elemental sulphur in kraft pulping	5	387			

# ALPHABETICAL INDEX TO VOLUME 39

The algal growth test for monitoring pulp and paper mill effluents	1	21	Effluents, The algal growth test for monitoring pulp and paper mill	1	21
Appita — The first 40 years	5	347	Elemental sulphur in kraft pulping, Effect of replacement of sodium sulphide by	5	387
The application of computer aided design and drafting to the engineering of pulp and paper mills	4	297	Engineering of pulp and paper mills, The application of computer aided design and drafting to the	4	297
Asian region, Production patterns for pulp and paper in the	3	181	The engineering of the Barwon paper mill at Fyansford	2	87
Aspects of on-site generation of chemical pulp bleaching chemicals	5	391	Environmental constraints on the availability and production of wood for industry in New Zealand	3	184
Availability and production of wood for industry in New Zealand, Environmental constraints on	3	184	Ethanol-water pulping and pulp properties of <i>Eucalyptus globulus</i> Lab, Kinetics of	6	455
Bark from pine pin chips, The segregation of	2	115	<i>Eucalyptus globulus</i> Lab, Kinetics of ethanol-water pulping and pulp properties of	6	455
Barwon paper mill at Fyansford, The engineering of	2	87	<i>Eucalyptus obliqua</i> L'Hérit, Genetic variation in the pulp qualities of	3	205
Bleaching stages of NZFP No. 2 bleach plant, Colour control of the first chlorination (D/C) and extraction (E1)	3	218	<i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> wood samples, Chemical analyses and oxidative studies of	5	361
The business of forestry	6	433	<i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> woods, A study of the delignification of	5	369
Career development — an investment in the future	4	277	<i>Eucalyptus regnans</i> wood, Delignification of, during soda pulping	2	110
Cement products, High yield wood pulps as reinforcement for	1	31	Extended delignification in a batch cooking system — report from start-up at Karlsborgs Bruk, Sweden	6	459
Changing world, Professional societies in a	5	349	Extractives and pitch, Determination of, by chromic acid oxidation	4	287
Characteristics of fibres and fines, Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 2:	5	379	Felts, On-machine sealed press	6	467
Chemical analyses and oxidative studies of <i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> wood samples	5	361	Fibres and fines, Characteristics of. Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 2:	5	379
Chemical aspects of pitch deposits in kraft pulping of hardwoods in Japanese mills	4	301	Finnish pulp and paper engineers, The further education of	6	430
Chemical pulp mill bleaching chemicals, Aspects of on-site generation of	5	391	Fire-damaged logs, Water spray storage of	1	8
Chemical pulping and bleaching, Recent developments in	4	310	Fire-killed <i>P. radiata</i> for treated roundwood posts, Harvesting and processing of	3	199
Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 1: Pulp properties	5	374	Fluorescence and Kubelka-Munk theory	6	433
Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 2: Characteristics of fibres and fines	5	379	Forestry, The business of	6	433
Chromic acid oxidation, Determination of extractives and pitch by	4	287	The further education of Finnish pulp and paper engineers	6	430
Coated paper, Overcoming the vessel picking tendency of	1	26	Genetic variation in the pulp qualities of <i>Eucalyptus obliqua</i> L'Hérit	3	205
Colour control of the first chlorination (D/C) and extraction (E1) bleaching stages of NZFP No. 2 bleach plant	3	218	Grammage uniformity, The role of headbox turbulence generators in	1	36
Colour measuring equipment, Comparison of some	4	307	Hardwoods in Japanese mills, Chemical aspects of pitch deposits in kraft pulping of	4	301
Comparison of some colour measuring equipment	4	307	Harvesting and processing of fire-killed <i>P. radiata</i> for treated roundwood posts	3	199
Composites containing wood pulp fibres	3	223	Headbox turbulence generators in grammage uniformity, The role of	1	36
Computer aided design and drafting, The application of, to the engineering of pulp and paper mills	4	297	High yield wood pulps as reinforcement for cement products	1	31
Condensed tannins (proanthocyanidin polymers), Some recent advances in the chemistry of, relevant to their use as industrial chemicals	6	477	How the New Zealand Clean Air Act relates to kraft pulp mills	3	187
Conference, 40th — opening address	4	272	Hydraulically transporting wood chips and tree logs, A new method of	3	213
Continuous digester washing models and prediction of washing efficiencies	1	41	Industrial chemicals, Some recent advances in the chemistry of condensed tannins (proanthocyanidin polymers) relevant to their use as	6	477
Continuous retention measurement on paper machine wire sections	6	463	Industry in New Zealand, Environmental constraints on the availability and production of wood for	3	184
Corrosion monitoring in the pulp and paper industry. Part 1 — Monitoring methods	6	472	Instruments, Digital conversion of paper testing Japanese mills, Chemical aspects of pitch deposits in kraft pulping of hardwoods in	4	301
C.R.C. kraft pulp mill in Northern Philippines, Program to improve the viability of the	2	84	Kinetics of ethanol-water pulping and pulp properties of <i>Eucalyptus globulus</i> Lab	6	455
Delignification of <i>Eucalyptus regnans</i> wood during soda pulping	2	110	Kraft pulp, Medium consistency oxygen delignification in an O(CD)(EO)D bleaching process for radiata pine	6	451
Determination of extractives and pitch by chromic acid oxidation	4	287			
Digital conversion of paper testing instruments	1	48			
Effect of replacement of sodium sulphide by elemental sulphur in kraft pulping	5	387			

	Issue No.	Page No.		Issue No.	Page No.
Kraft pulp mill in Northern Philippines, Program to improve the viability of the C.R.C. ....	2	84	Pulp properties of <i>Eucalyptus globulus</i> Lab, Kinetics of ethanol-water pulping and .....	6	455
Kraft pulp mills, How the New Zealand Clean Air Act relates to .....	3	187	Pulp qualities of <i>Eucalyptus obliqua</i> L'Herit, Genetic variation in the .....	3	205
Kraft pulping, Effect of replacement of sodium sulphide by elemental sulphur in .....	5	387	Pulping, followed by oxygen delignification, Low Kappa .....	2	129
Kraft pulping of hardwoods in Japanese mills, Chemical aspects of pitch deposits in .....	4	301	Pulpwood resource, Use of myrtle beech ( <i>Nothofagus cunninghamii</i> ) as a .....	3	230
Kubelka-Munk theory, Fluorescence and .....	4	293	Pulpwood from Papua New Guinea, Prospects for Radiata pine, Sulphonation of SGW and RMP rejects from .....	5	352
Low Kappa pulping followed by oxygen delignification .....	2	129	Radiata pine kraft pulp, Medium consistency oxygen delignification in an O(CD)(EO)D bleaching process for .....	2	121
Medium consistency oxygen delignification in an O(CD)(EO)D bleaching process for radiata pine kraft pulp .....	6	451	Radiata pine pulp, Oxygen-alkali treatment and short sequence bleaching of .....	6	451
Monitoring pulp and paper mill effluents, The algal growth test for .....	1	21	Radiata pine slabwood and corewood, Chemimechanical and thermomechanical pulps of. Part 1: Pulp properties .....	6	445
Myrtle beech ( <i>Nothofagus cunninghamii</i> ) as a pulpwood resource, Use of .....	3	230	Radiata pine slabwood and corewood, Chemimechanical and thermomechanical pulps of. Part 2: Characteristics of fibres and fines .....	5	374
Neutral-sulphite anthraquinone pulp fibres, Some unique properties of .....	2	134	Recent developments in chemical pulping and bleaching .....	5	379
A new method of hydraulically transporting wood chips and tree logs .....	3	213	Reinforcement for cement products, High yield wood pulps as .....	4	310
New Zealand, Environmental constraints on the availability and production of wood for industry in .....	3	184	Replacement of sodium sulphide by elemental sulphur in kraft pulping, Effect of .....	1	31
New Zealand Clean Air Act, How the, relates to kraft pulp mills .....	3	187	Retention measurement on paper machine wire sections, Continuous .....	5	387
On-site generation of chemical pulp mill bleaching chemicals, Aspects of .....	5	391	RMP rejects from radiata pine, Sulphonation of SGW and .....	6	463
Opening address, 40th Conference — .....	4	272	The role of headbox turbulence generators in grammage uniformity .....	2	121
Overcoming the vessel picking tendency of coated paper .....	1	26	The segregation of bark from pine pin chips .....	1	36
Oxidative studies of <i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> wood samples, Chemical analyses and .....	5	361	SGW and RMP rejects from radiata pine, Sulphonation of .....	2	115
Oxygen delignification, Low Kappa pulping followed by .....	2	129	Short sequence bleaching of radiata pine pulp, Oxygen-alkali treatment and .....	2	121
Oxygen delignification in an O(CD)(EO)D bleaching process for radiata pine kraft pulp, Medium consistency .....	6	451	Soda pulping, Delignification of <i>Eucalyptus regnans</i> wood during .....	6	445
Oxygen-alkali treatment and short sequence bleaching of radiata pine pulp .....	6	445	Soda-anthraquinone pulping Part II, Studies on. A comparison of kraft, kraft-AQ and soda-AQ-ethanol pulps from <i>Pinus radiata</i> wood .....	2	110
Paper from <i>Pinus radiata</i> — the first 30 years .....	6	436	Some recent advances in the chemistry of condensed tannins (proanthocyanidin polymers) relevant to their use as industrial chemicals .....	4	289
Paper machine wire sections, Continuous retention measurement on .....	6	463	Some unique properties of neutral-sulphite anthraquinone pulp fibres .....	6	477
PAPRO — New Zealand .....	4	275	Studies on soda-anthraquinone pulping Part II. A comparison of kraft, kraft-AQ and soda-AQ-ethanol pulps from <i>Pinus radiata</i> wood .....	2	134
Papua New Guinea, Prospects for pulpwood from Pine, Profiting from .....	5	352	A study of the delignification of <i>Eucalyptus regnans</i> , <i>E. diversicolor</i> , <i>E. marginata</i> and <i>E. tetrodonta</i> woods .....	4	289
Pine pin chips, The segregation of bark from .....	4	273	Sulphonation of SGW and RMP rejects from radiata pine .....	5	369
<i>Pinus radiata</i> , Paper from — the first 30 years .....	2	115	Thermomechanical pulps of radiata pine slabwood and corewood, Chemimechanical and. Part 1: Pulp properties .....	2	121
Pitch, Determination of extractives and, by chromic acid oxidation .....	6	436	Thermomechanical pulps of radiata pine slabwood and corewood, Chemimechanical and. Part 2: Characteristics of fibres and fines .....	5	374
Pitch deposits in kraft pulping of hardwoods in Japanese mills, Chemical aspects of .....	4	287	Transporting wood chips and tree logs, A new method of hydraulically .....	5	379
Prediction of washing efficiencies, Continuous digester washing models and .....	4	301	Use of myrtle beech ( <i>Nothofagus cunninghamii</i> ) as a pulpwood resource .....	3	213
Press felts, On-machine seamed .....	1	41	Vessel picking tendency of coated paper, Overcoming the .....	3	230
Production patterns for pulp and paper in the Asian region .....	6	467	Washing efficiencies, Continuous digester washing models and prediction of .....	1	26
Professional societies in a changing world .....	3	181	Water spray storage of fire-damaged logs .....	1	41
Profiting from pine .....	5	349	Wood chips and tree logs, A new method of hydraulically transporting .....	1	8
Program to improve the viability of the C.R.C. kraft pulp mill in Northern Philippines .....	4	273	Wood pulp fibres, Composites containing .....	3	213
Prospects for pulpwood from Papua New Guinea .....	2	84		3	223
Pulp and paper in the Asian region, Production patterns for .....	5	352			
Pulp and paper industry, Corrosion monitoring in the. Part 1 — Monitoring methods .....	3	181			
Pulp and paper mill effluents, The algal growth test for monitoring .....	6	472			
Pulp and paper mills, The application of computer aided design and drafting to the engineering of .....	1	21			
Pulp properties. Chemimechanical and thermomechanical pulps of radiata pine slabwood and corewood. Part 2: .....	4	297
